Operable Window Vertical Zero Mullion

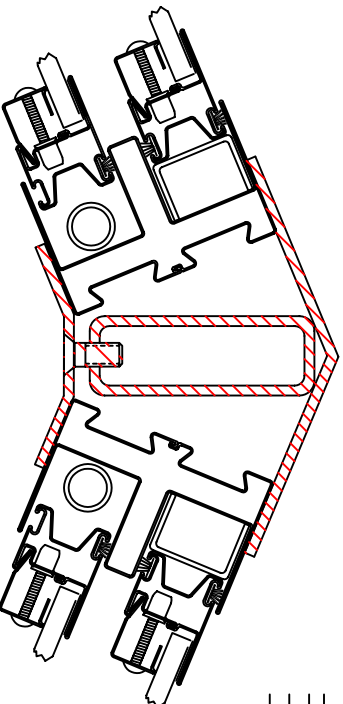

MULLIONS

Fyre-Tec offers several mullion styles that allow interconnection of the framing systems permitting the openings to exceed the size of the largest individual window. Two or more windows may be "mullied" to fill the opening or create the "look" desired while maintaining the protective integrity.

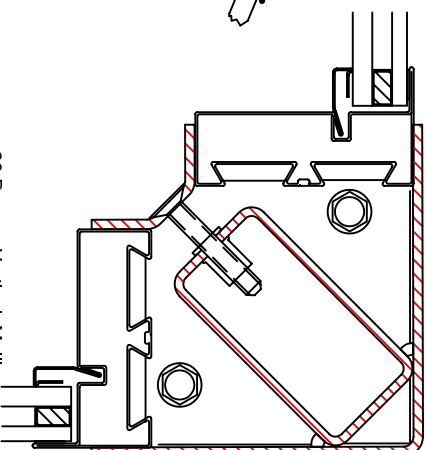

NFPA 80 restricts mullied opening to 84 square feet maximum, with neither height nor width dimension to exceed 12 feet.

Heavy Vertical Mullion

45 Degree Vertical Mullion

90 Degree Vertical Mullion
